

FishFace

FF100

Fishface is a completely submersible pan & tilt head with camera housing which is ideal for all Aquatic Sports and Wildlife applications.

The system can be fitted to any existing Polecam rig and enables the operator to achieve seamless live transition shots from Air to Water to Air.

When used with a Polecam rig, the unit is effective down to depths of 4m (13'), replacement drilled carbon poles are used – these "holey poles" ensure that the flooding and draining of the boom is quick and quiet when being submersed, manoeuvred and removed.

The current camera housing accommodates HD minicams from manufacturers such as Toshiba, Iconix, Antelope and Indiecram - offering full remote Iris and Focus control.

Modified systems can also be supplied for the slightly larger IO Industries Flare, and the Panasonic POV
(information available upon request)

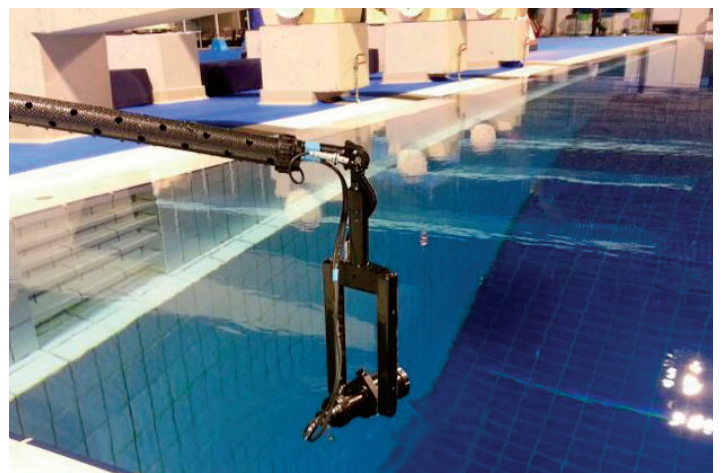

The camera housing can also be used as a stand-alone unit and is useable to a depth of 100m (328')

- Supplied complete in a SKB Flight Case with custom foam insert
- Weight 1.64 kg (complete excluding camera & lens)
- Drop arm 130 x 29 x 455mm
- Housing 68 x 205mm (excluding clamp)

Note:

When purchasing the Fishface system (FF100) a maximum of 4 Drilled carbon poles (FF181) are provided as a "trade-in" against existing Full carbon poles (PM020).

Should a trade-in not be required then you would need to purchase the Drilled carbon poles (FF181) separately
(upto a maximum of 4 pieces)

FishFace FF100
